
Shared loci require PP.H4 >= 0.80 under both p12=10^-5 and p12=10^-6 and regional P < 10^-5 for both traits. Every cell retains pleiotropy/heterogeneity limitations; no cell denotes causal confirmation.

Multimethod directional association
Method-sensitive association
Primary null; MHC-sensitive
No primary FDR support
MR-PRESSO outliers seed-stable
MR-PRESSO outliers seed-sensitive
